

The Attorney General of California has prepared the following title and summary of the chief purpose and points of the proposed measure:

CHILD SAFETY REQUIREMENTS FOR ARTIFICIAL INTELLIGENCE PRODUCTS.

PROHIBITS SMARTPHONES IN SCHOOLS. INITIATIVE STATUTE. Requires risk assessments and risk labels for artificial intelligence (AI) products likely to be used by children. Prohibits distribution to children of AI products that present an “unacceptable risk,” including certain “companion chatbots” (AI software that simulates humanlike relationships). Extends prohibition on selling or sharing personal data without consent to all children under 18 (up from 16). Authorizes new monetary penalties in lawsuits for actual harm to children caused by AI or social media products. Prohibits student use of personal smartphones, smartwatches, and tablets at school. Summary of estimate by Legislative Analyst and Director of Finance of fiscal impact on state and local governments: **Increased state regulatory and enforcement costs potentially in the tens of millions of dollars annually to regulate certain AI products related to children and process court cases seeking monetary awards allowed by the measure for violation of its provisions. Some or all of these costs would be offset by regulatory fees or monetary awards received by the state.** (25-0025A1.)
